

PathoSans® is a new paradigm in cleaning, sanitizing and disinfecting resulting in savings, sustainability and simplicity.

Electrochemically-Activated Solutions

PathoSans on-site generation system transforms ordinary softened tap water into two types of electrochemically-activated (ECA) solutions, PathoClean® and PathoCide®. These two solutions are produced automatically and can replace most of the chemical cleaners currently used in your facility.

What is On-Site Generation?

On-site generation (OSG) refers to the creation of cleaning solutions through the use of ECA water technology on site and on demand. Instead of relying on off-site, conventional chemical manufacturers and distributors, OSG and ECA allow you to cut costs while creating and using your own safer and more effective cleaning solutions.

ElectroChemically-Activated Solutions

The PathoSans system uses state-of-the-art electrochemical activation technology to generate environmentally responsible cleaning and sanitizing solutions right in your facility.

Effective

The proof is in the clean. PathoSans solutions kill 99.999% of harmful pathogens leaving no residue, so surfaces get cleaner and stay clean longer.

Economical

Producing PathoSans solutions onsite usually costs less than seven cents a gallon. Solutions lower labor costs by reducing mixing, rinsing, and dwell time.

Environmentally Responsible

Improve cleaning while reducing your carbon footprint, water usage, and waste. With no VOCs, phthalates, or detergents, PathoSans solutions will help you meet your sustainable cleaning goals, including LEED certification.

Asthma and Allergies

Installing a PathoSans system at your school or university helps eliminate fragrances and harsh detergents that trigger asthma and allergies.

Employee Friendly

No personal protective equipment will be necessary, because PathoSans solutions are non-irritating and fragrance free.

Ready to Use

Stop buying cleaning chemicals. PathoSans solutions are generated automatically on-site and on demand, eliminating chemical ordering, storing, and mixing.

How Does PathoSans Work?

PathoClean - Cleaner & Degreaser:

Removes biofilm and prepares the surface for disinfection.

PathoCide - Sanitizer & Disinfectant

Kills 99.999% of disease-causing organisms in seconds
